

Graphite Note + Microsoft Dynamics ERP Partners

CHALLENGE

ERP clients want more than dashboards – they want answers: What’s likely to happen? Why did performance shift? And what actions will move the needle?

Most **Microsoft Dynamics partners don’t have the internal data science resources** to deliver those insights. And custom ML is expensive, inconsistent, and hard to maintain.

That’s where Graphite Note steps in; giving partners a no-code AI engine to scale predictive solutions fast.

EXAMPLE PACKS

Consumer Goods

- Demand Forecasting by SKU/store/week
- Customer Churn Scoring
- Product Basket Affinity Analysis

Manufacturing

- Scrap% Causal Model (Decision Impact Model)
- Margin Driver Insights
- Inventory Optimization Forecasting

SOLUTION

Graphite Note is a **no-code Decision Intelligence** platform designed for business consultants and analysts – no Python or ML background required.

Together with ERP partners, we co-build industry-ready AI Packs; 3–5 machine learning models tailored to your verticals, like Manufacturing, Distribution, and CPG.

You bring your domain knowledge and client context.

We bring the ML infrastructure and model building engine.

Common data sources: Business Central, Finance & Operations, CE, Power BI, Azure SQL, Excel.

IMPACT

What ERP partners gain with Graphite Note:

- Launch ML offerings without hiring data scientists
- Package solutions that scale across similar clients
- Reduce onboarding time with reusable model templates
- Unlock new recurring revenue via predictive services

Example outcomes:

- +18% increase in forecast accuracy across SKUs, helping reduce excess inventory and avoid stockouts
- Cut customer churn by 27% in 90 days using predictive scoring and targeted retention actions
- Saved 120+ hours/month in manual analysis through automated margin driver insights and prescriptive next steps

Let’s explore a co-built AI Pack your team can deploy, brand, and grow.
